

HOLYOKE COMMUNITY COLLEGE

Futures Inspired

HCC's Medical Billing Program 2013

Medical Billing and Electronic Health Records are among the fastest growing careers, according to the US Department of Labor. Holyoke Community College (HCC) is now offering a new Medical Billing Program that provides:

- Opportunity to complete in less than a year
- Coursework taught by working professionals
- An externship with one of our partner employers
- Virtual lab experience with real-to-life records

Medical Billing is a selective admission program. A grade of C or better in medical terminology (HTH 114) must be achieved before the start of classes and students must be eligible for English 101. All credits earned in the Medical Billing program can be transferred towards the Medical Coding associate's degree program at Springfield Technical Community College.

For more information on the program, please contact:

Abby Mahoney, HCC Medical Billing Advisor
