

BAYSTATE MEDICAL CENTER STUDENT AMBASSADOR PROGRAM SUMMER-2019

The Baystate Medical Center Student Ambassador program continues to be both an educational and growth experience for students while actively providing volunteer hours in service to Baystate's patients, families and visitors.

Qualifications:

Students should be related to Baystate Health Employees. We try to reserve a few slots for students from the community. Students must be 16 years old by May 1, 2019 and turn no older than 18 years old before August 9, 2019. Students must be interested in learning about or pursuing a career in health care.

Application Process – Important

Call in DATE:

We will take names for the program on **February 6, 2019 by calling 794-4210 between 9am and 4pm** (Please do not page us, call any other numbers or send us emails that day - you must call 794-4210 to apply.) Please note that we will take all names of students called in that day. There is no need to rush to call at 9am as you have until 4pm to call in and apply. The student or a family member or friend can call that day on the student's behalf as long as the caller can tell us your department at Baystate and your relationship to the student applicant – we will need the student's name, a parent's or guardian's name and both of their phone numbers and email addresses. Given the interest in this program and in fairness to everyone, calls or messages will not be accepted before that day. Names received after February 7th will be put on a waiting list.

Program Requirements:

The program is a summer-long commitment which will begin June **28, 2019** and continue through **August 9, 2019**. Students are required to volunteer a full day (always the same assigned day) once a week and attend evening hands-on, educational in-services. In order to qualify for a certificate of completion for this program, students must volunteer at least 5 weeks (days) during the summer and must attend a minimum of two of the evening sessions.

Thank you, Marie Saunders, Volunteer Manager, Baystate Medical Center
