

MY CAREER PATH STORY

Nursing Faculty

**HAMPDEN COUNTY
WORKFORCE BOARD**

I completed my degrees and/or certification in this order:

1. I started off at a community college (1 yr.)
2. Transferred to a 4 year college
3. Five + years after my undergrad studies (BSN), I pursued and attained my graduate degree (MSN)
4. After teaching 8+ years (classroom and fieldwork) with my MSN, I pursued and attained a terminal degree in higher education (EdS)

Currently, I work as nursing faculty. I enjoy the flexible schedule, weekends/holidays/summers off. My typical workday include: classroom teaching, supervise and advise students, committee work, and research. The things I like least about my work are having a lot of meetings, and dealing with technological issues.

My future goal is to obtain attain a position of power that can inform/improve support, policies, and practices that will benefit all students. I plan to do this by attaining of a terminal degree in Education (EdS) and share my capstone study (research project) with the educational institution where I work.
